Orange County, Va.

In the broad limits of this proud Old Commonwealth, where is a land to be found more favored with the bounteous gifts of nature than this, Land we love, the county of Orange?—Unsurpassed in the original fertility of its soil, or the ease and rapidity of its restoration, when wasted by injudicious culture, no section of the State presents so inviting a prospect to the enterprising or to the amateur farmer.—Its name is derived from the complexion of its soil which is imparted to it by the disintegration of its sub-stratum soft ochre colored rock which, underlies all the red land district, and which, according to Prof. W. B. Rodgers, having a strong affinity for ammonia, is readily converted into soil by exposure to atmospheric influences. Hence the speedy restoration and high degree of fertility of which this description of land is susceptible. That portion of the county lying North West of the red land and sloping to the river, is more level—the soil less tenacious and composed of disintegrated chocolate shale—easily cultivated and highly productive. The Eastern section, whose streams are mostly tributary to the Pamunkey, as those of the Middle and Western to the Roanoke, embraces many large and fertile districts. The gold mines of this section were, some years since, worked with profit and now present a tempting investment to capitalists—iron ore is found immediately on the line of the O. & A. R. Road, but to what extent and of what value, has never been developed. In the immediate vicinity also, limestone of excellent quality and of easy access, exists in great abundance. Its application to the adjacent grey lands, as a renovator of the soil, has never been fairly tested.

In diversity of soil and variety of production, the county of Orange is excelled by no district in this or any other State. From its first settlement to a comparatively recent period, tobacco was its staple; and may be grown as successfully now and with profit. Its soil is admirably adapted to all the cereals and is unsurpassed in the production of corn, except perhaps, by alluvial bottoms. The opinion once prevailed, though only among the followers of prescriptive usage, that it was not adapted to grass, and consequently could never become a successful grazing district.—Experience, however, has long since shown that the most popular and remunerative business on all improved farms. If not "the paradise of cattle," Orange beef has compared most favorably with the best specimens of the markets, and its mutton and butter have been unrivaled. Since attention has been directed to the production of fruit, eminent success has followed every well directed effort, and the choicest varieties are to be found in our own and the Northern markets—the produce of our orchards. The cherry in all its varieties, may be said to be indigenous and flourishes in wasteful abundance. The peach attains the highest perfection under skillful attention, as do all the varieties of the pear. The grape grows spontaneously in the forests and fence corners, and the native and improved varieties are successfully cultivated.

The skill and experience of the professional vintager find here advantages in soil, locality and climate that would compare most favorably with the most favored districts. I need hardly advert to Horticultural products—the endless variety of these found in every kitchen, garden, and on every table, sufficiently testify to the virtues of the soil. Those valuable esculents—the Irish and sweet potato—the former combining in itself the meat and bread of the poor in the North and the latter a like office in the South, are successfully and abundantly raised—the one in great perfection, the other inferior to that on sandy soils, yet excellent for the health of culinary purposes.

The ample of the county is illustrated by the longevity of its men and the beauty and bloom of its women. Intermittent and bilious fevers are of rare occurrence, and when they do exist, are to be traced to local causes—copious and perennial springs of the purest freestone water around in every direction—supplying running streams in every enclosure and often eligible sites for milling and manufacturing purposes.

Intersected by two of the leading railroads of the State—the Orange and Alexandria and Virginia Central—the former traversing its territory obliquely for many miles, its facility for marketing its products are unequalled, being within a few hours of Lynchburg, Richmond, Alexandria, Washington and Baltimore. The general surface is boldly undulating—sometimes, with elevations aspiring to the dignity of mountains. Its scenery is beautifully picturesque, without being rugged—presenting from its elevations a magnificent panorama and the most attractive landscapes for the pencil of the artist.

The generous and refined hospitality of the people of Orange has long been proverbial, and if their material prosperity has, in better times, been retarded or impeded by too free an indulgence in their noble characteristics they have the consolation of feeling that, their side, if fault it be, is one "that leans to virtue's aid."

POULTERER'S FRIEND.
A CERTAIN CURE FOR
GAPES AND OTHER DISEASES IN
CHICKENS AND TURKEYS.
A Certain Preventive of all Chicken Cholera. Will prevent disease in all kinds of fowl, and promote an increase of fat. Read the following:
Jefferson, Frederick co., Md.,
July 22d, 1887.

Messrs. Clowworthy & Co.:
Gents—The wonderful cures which have been made by your Poulterers' Friend cannot fail to interest all who raise poultry. A gentleman from this village has been experimenting on chickens with the gapes. He tried your Poulterers' Friend, according to the directions, and it had the desired effect in removing the worm, effectually relieving the chicken at once. Since then I have had many calls for it, and it has been used extensively with all the same result. It is of incalculable value to all who raise poultry.

WHAT! PAPER BAGS AGAIN?
Yes! PAPER BAGS again, and it will be again and again to think, if a discriminating people continue to buy, I shall continue the supply, and keep up the cry, PAPER BAGS. By calling and examining these Paper Bags, you will soon discover why they sell so readily upon so short an acquaintance, and that it is their cheapness, and this grows out of the fact that these Paper Bags are made, thus saving one profit. Why the fact is we sell largely to other manufacturers at our card list prices, which gives them a wide margin according to their list prices.

In conclusion, I have just received a LARGE SUPPLY of PAPER BAGS; also, common and fine MANILLA WRAPPING PAPER, direct from two manufacturers, and intend to make these articles specialties in connection with my other Paper and Stationery business. You need not go beyond Alexandria for these things, at least.

MEDICAL.

BALTIMORE LOCK HOSPITAL.
ESTABLISHED AS A REFUGE FROM
QUACKERY.

THE ONLY PLACE WHERE A CURE
CAN BE OBTAINED.

DR. JOHNSON has discovered the most Certain, Speedy, and only Effectual Remedy in the World for Weakness of the Back or Limbs, Stricture, Affection of the Kidneys or Bladder, Involuntary Discharges, Impotency, General Debility, Nervousness, Dyspepsia, Languor, Low Spirits, Confusion of Ideas, Palpitation of the Heart, Timidity, Trembling, Dimness of Sight, or Giddiness, Disease of the Head, Throat, Nose or Skin, Affections of the Lungs, Stomach or Bowels—those Terrible Disorders arising from Solitary Habits of Youth—secret and solitary practices more fatal to their victims than the song of Syrens to the Mariners of Ulysses, blighting their most brilliant hopes or anticipations, rendering marriage, &c., impossible.

YOUNG MEN,
Especially, who become the victims of solitary vice, that dreadful and destructive habit which annually sweeps away an untimely grave thousands of our young men of the most excellent talents and brilliant intellect, who might otherwise have entranced listening Senators with the thunders of eloquence, or waked to ecstasy the living lyre, may call with full confidence.

MARRIAGE.
Married Persons, or Young Men contemplating marriage, being aware of Physical Weakness, Organic Debility, Deformities, speedily cured.
He who places himself under the care of Dr. J. may religiously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

ORGANIC WEAKNESS
Immediately cured and full vigor restored.
This distressing affection, which renders life miserable and marriage impossible, is the penalty paid by the victims of impropriety. Young persons are too apt to commit serious errors from not being aware of the dreadful consequences that may ensue. Now, who that understands the subject will pretend to deny that the power of procreation is lost sooner by those falling into improper habits than by the prudent? Besides being deprived of the pleasure of healthy offspring, the most serious and destructive symptoms of both body and mind arise. The system becomes deranged, the Physical and Mental Functions Weakened, Loss of Procreative Power, Nervous Irritability, Dyspepsia, Palpitation of the Heart, Indigestion, Constitutional Debility, and Wasting of the Frame, Consumption, Decay and Death.

DR. JOHNSON,
Member of the Royal College of Surgeons, London, Graduate of one of the most eminent parts of whose life has been spent in the hospitals of London, Paris, Philadelphia, and elsewhere, has effected
